Kondor Up

by teciem

Treasury as a Service, powered by Kondor.

FACTSHEET

Kondor Up by Teciem delivers the proven front-to-back treasury capabilities of Kondor through the cloud-native operating model, where treasurers can deploy faster, operate lighter and access innovation in real time to stay ahead.

1
Launch faster

Go live with your new treasury solution in weeks, not in years and be hands-on from day one.

2
Operate lighter

We manage the infrastructure and take care of all maintenance (be that updates, upgrades or performance), so you don't have to.

3
Scale to your needs

As your business grows, your solution can scale up to meet your performance, volume and operational needs.

4
Stay ahead. Stay resilient

Deploy cloud-native security and keep pace with software updates and innovation, so you're prepared for whatever the future brings.

Kondor Up
by teciem

A consistent, scalable, and controlled environment that maintains the flexibility required for the modern treasury.

Secure by design

Kondor Up runs in a dedicated, single-tenant environment on your choice of public cloud – combining complete data isolation with built-in security controls, strong authentication and regulatory-grade governance.

Cloud-native by design

Kondor Up combines elastic scalability and a single current codebase with dedicated single-tenant architecture, built-in resilience, high availability and cross-region disaster recovery.

Built around your ambition

Powered by the Kondor treasury engine, Kondor Up delivers front-to-back functionality across the trading lifecycle, allowing you to expand products, volumes and scale operations without changing platforms.

Standardized deployment

Kondor Up combines pre-configured treasury packages with automated deployment, testing and release processes – enabling predictable, scalable implementation and new environments in hours.

Operations are managed as a service

Teciem and our partners manage everything, from monitoring and maintenance to upgrades, security and regulatory updates – reducing operational burden while keeping Kondor Up stable, secure and current.
